Provident Trust Strategy Fund (PROVX)
Letter to Shareholders (Unaudited)

March 31, 2016

Dear Fellow Provident Trust Strategy Fund Shareholders,

For the first six months of PROVX's fiscal year beginning October 1st, the Fund advanced 9.32% compared to the S&P 500's 8.49% gain. PROVX gained +1.79% for the quarter ended March 31st vs. the S&P 500's +1.35% gain. During Provident Trust Company's tenure as portfolio manager (September 9, 2002), PROVX gained 227.20% cumulatively vs. 200.99% for the S&P 500, while maintaining 21.6% average portfolio liquidity. Top portfolio weighted performers for the March quarter were Fastenal (a bottom performer in 2015), Accenture and The TJX Companies, while eBay, Franklin Resources and PNC Financial Services Group represented our worst performers. PROVX was 85.9% invested in equities on March 31st and the Fund's top 10 holdings represent 73.3% of total net assets. We believe the following investment practices differentiate PROVX:

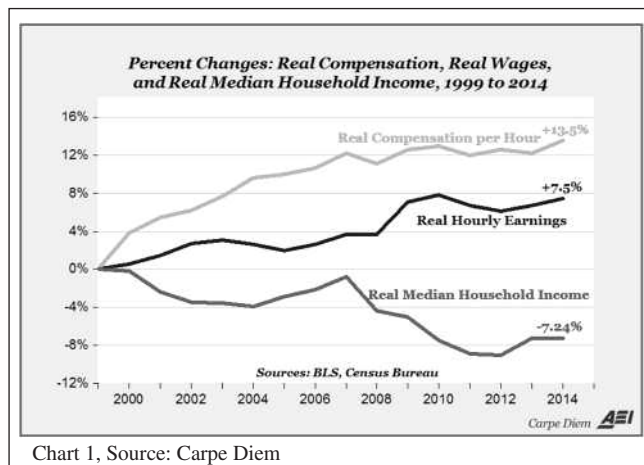

Chart 1, Source: Carpe Diem

1. PROVX is managed to be the sole or core holding for investors seeking long-term purchasing power growth.
2. Concentration not diversification. PROVX is invested in 14 equity positions. Active share, the percentage of the portfolio that is different than the S&P 500 weightings, is 92.2%. Portfolio turnover was 9.8% on average over the past 3 years.
3. Flexible asset allocation. Since September 9, 2002, PROVX's equity allocation has ranged from 29.6% to 97.1% and averaged 78.4%. We accept potential underperformance in rapidly rising markets in exchange for the potential outperformance during market declines.
4. Steady adherence to our growth at reasonable valuation (GARV) strategy.
5. Manager commitment. The portfolio managers own 7% of PROVX.

American employment and income trends exceed the consensus view. Americans employed surged 13 million over the past six years to an all-time peak. Median household income, which does not adjust for fewer workers per household or government transfer payments (disability and the earned income tax credit), declined 7.2% since 2000 (see chart 1). Inflation adjusted compensation, which we contend is a more accurate indicator of consumer health, rose +13.5%. Additional examples of progress since the 2007 GDP peak include:

1. Record home prices; homeowners' equity is a healthy 57%, well above the 38% trough (Gluskin Sheff).
2. Record \$86.8 trillion Consumer Net Worth (CNW), well above the \$70 trillion prior peak.
3. Cleaner/cheaper natural gas is replacing coal as America's base source for electricity. Lower 48 state oil/gas production soared 64% over the past ten years; domestic production now exceeds 90% of USA's energy consumption.

We forecast 2-3% 2016 GDP growth along with 1-2% inflation, a favorable environment for financial asset returns. We believe investors will be rewarded for 20 years of 2% average inflation by higher price/earnings valuations.

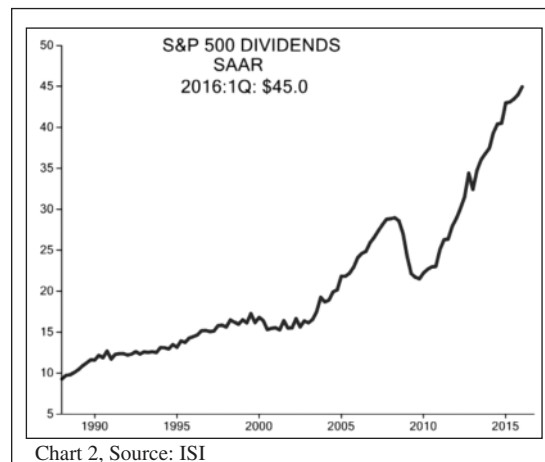

Chart 2, Source: ISI

The 2015 GAAP price/earnings ratio for the S&P 500 is 23X, which equates to an earnings yield of 4.4%, well in excess of the 1.75% 10-year Treasury yield. 2016 GAAP S&P 500 EPS should rebound thanks to substantially reduced oil write offs (energy's share of S&P 500 EPS dropped from 21% in 2008 to 2.3% in 2015) and a flat dollar vs. 2015's 10-20% currency headwind. We forecast a -5 to +10% S&P 500 return based on \$105 2016 GAAP earnings (vs. \$90 in 2015), a record \$46 dividend (see chart 2) and an 18-21X price earnings range. Morningstar reports redemptions of \$245 billion from actively managed funds over the past year vs. over \$400 billion of inflows to passive funds, to us, another sign of excess investor caution. While stocks can remain "cheap" to bonds for many more years, we maintain Provident's GARV (growth at reasonable valuation) investment strategy can improve client inflation adjusted purchasing power over the next market cycle.

Thank you for your investment in the Provident Trust Strategy Fund.

J. Scott Harkness, CFA
President

The Fund's 1-year and annualized 5-year and 10-year returns through March 31, 2016 were: 7.04%, 9.13% and 6.83%, respectively. The S&P 500, the Fund's benchmark index, 1-year and annualized 5-year and 10-year returns through March 31, 2016 were: 1.78%, 11.58% and 7.01%, respectively.

The returns do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or the redemption of Fund shares. Performance data quoted represents past performance; past performance does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance since the above time period may be higher or lower than the performance quoted. Performance data current to the most recent month end may be obtained by visiting www.provfunds.com.

While the Fund is no load, management and other expenses still apply. As per the Fund's Prospectus dated January 31, 2016, the total annual fund gross operating expenses as a percentage of the value of your investment, which incorporates indirect fees and expenses that the Fund incurs from investing in the shares of other mutual funds or acquired fund fee expenses ("AFFE"), is 1.03%. After fee waivers and/or expense reimbursements, the total annual net expense ratio was 1.02%.

Mutual fund investing involves risk. Principal loss is possible. The Fund is non-diversified, meaning it may concentrate its assets in fewer individual holdings than a diversified fund. Therefore, the Fund is more exposed to individual stock volatility than a diversified fund. The Fund may invest in smaller and medium sized companies, which involve additional risk such as more limited liquidity and greater volatility.

Fund holdings and sector allocations are subject to change and should not be considered a recommendation to buy or sell any security. For a complete list of Fund holdings, please refer to the Schedule of Investments in this report.

The S&P 500 is an unmanaged index, consisting of 500 selected common stocks, commonly used to measure the performance of U.S. stocks. It is not possible to invest directly into an index.

Earnings Yield: The earnings per share for the most recent 12-month period divided by the current market price per share.

GDP: Gross Domestic Product

GAAP: Generally Accepted Accounting Principles

ISI: International Strategy & Investment

EPS: Earnings per Share

Portfolio Liquidity: Cash, money market and bond portfolio component.

Earnings Growth is a measure of a company's net income over a specific period, is a key indicator for measuring a company's success, and the driving force behind stock price appreciation. Earnings growth is not a measure of the Fund's future performance.

Opinions expressed are subject to change, are not guaranteed and should not be considered investment advice or recommendations to buy or sell any security. Current and future holdings are subject to risk.

Stocks are generally perceived to have more financial risk than bonds in that bond holders have a claim on firm operations or assets that is senior to that of equity holders. In addition, stock prices are generally more volatile than bond prices. Investments in debt securities typically decrease in value when interest rates rise. This risk is usually greater for longer-term debt securities. A stock may trade with more or less liquidity than a bond depending on the number of shares and bonds outstanding, the size of the company, and the demand for the securities. Similarly, the transaction costs involved in trading a stock may be more or less than a particular bond depending on the factors mentioned above and whether the stock or bond trades upon an exchange. Depending on the entity issuing the bond, it may or may not afford additional protections to the investor, such as a guarantee of return of principal by a government or bond insurance company. There is typically no guarantee of any kind associated with the purchase of an individual stock. Bonds are often owned by individuals interested in current income while stocks are generally owned by individuals seeking price appreciation with income a secondary concern. The tax treatment of returns of bonds and stocks also differs given differential tax treatment of income versus capital gain. Investments in debt securities typically decrease in value when interest rates rise. This risk is usually greater for longer-term debt securities.

You may obtain a hardcopy of the prospectus and the most recent performance data by calling (855) 739-9950 (also available at www.provfunds.com). Please read the statutory and summary prospectus carefully to consider the investment objectives, risks, charges and expenses before investing or sending money. The prospectus contains this and more information. Please read the prospectus carefully before investing.

**Provident Trust Strategy Fund
Expense Example (Unaudited)**

As a shareholder of the Provident Trust Strategy Fund, you incur ongoing costs, including management fees and other Fund expenses. You do not incur transaction costs such as sales charges (loads) on purchase payments, reinvested dividends, or other distributions; redemption fees; and exchange fees because the Fund does not charge these fees. This example is intended to help you understand your ongoing costs (in dollars) of investing in the Fund, and to compare these costs with the ongoing costs of investing in other mutual funds.

The example is based on an investment of \$1,000 invested at the beginning of the period and held for the entire period from October 1, 2015 through March 31, 2016.

Actual Expenses

The first line of the table below provides information about actual account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first line under the heading entitled “Expenses Paid During Period” to estimate the expenses you paid on your account during this period.

In addition to the costs highlighted and described below, the only Fund transaction costs you might currently incur would be wire fees (\$15 per wire), if you choose to have proceeds from a redemption wired to your bank account instead of receiving a check. Additionally, U.S. Bank charges an annual processing fee (\$15) if you maintain an IRA account with the Fund. To determine your total costs of investing in the Fund, you would need to add any applicable wire or IRA processing fees you’ve incurred during the period to the costs provided in the example below.

Hypothetical Example for Comparison Purposes

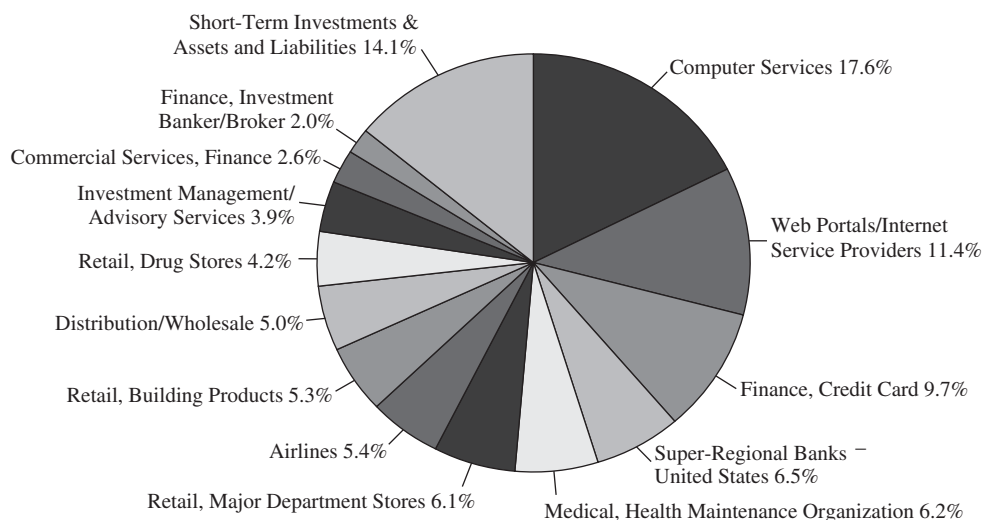

The second line of the table below provides information about hypothetical account values and hypothetical expenses based on the Fund’s actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund’s actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in the Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as sales charges (loads), redemption fees or exchange fees. Therefore, the second line of the table is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher.

	Beginning Account Value <u>10/01/15</u>	Ending Account Value <u>3/31/16</u>	Expenses Paid During Period* <u>10/01/15 – 3/31/16</u>
Provident Trust Strategy Fund			
Actual	\$1,000.00	\$1,093.20	\$5.23
Hypothetical (5% return before expenses)	\$1,000.00	\$1,020.00	\$5.05

* Expenses are equal to the Fund’s annualized expense ratio of 1.00%, multiplied by the average account value over the period, multiplied by 183/366 (to reflect the one-half year period between October 1, 2015 and March 31, 2016).

Provident Trust Strategy Fund
Notes to Financial Statements
March 31, 2016 (Unaudited)

(1) Summary of Significant Accounting Policies

The following is a summary of significant accounting policies of Provident Mutual Funds, Inc. (the “Company”), which is registered as an open-end management investment company under the Investment Company Act of 1940, as amended (the “1940 Act”). The Company consists of one non-diversified fund – Provident Trust Strategy Fund (the “Fund”). The Company was incorporated under the laws of Wisconsin on May 23, 1986.

The investment objective of the Fund is long-term growth of capital.

- (a) Each security, excluding short-term investments with maturities of 60 days or less, is valued at the last sale price reported by the principal security exchange on which the issue is traded. Securities that are traded on the Nasdaq Markets are valued at the Nasdaq Official Closing Price, or if no sale is reported, the latest bid price. Securities which are traded over-the-counter, bonds and short-term securities with greater than 60 days to maturity are valued at the latest bid price. Short-term investments with maturities of 60 days or less are valued at amortized cost. Securities for which quotations are not readily available are valued at fair value as determined by the investment adviser under the supervision of the Board of Directors. The fair value of a security may differ from the last quoted price and the Fund may not be able to sell a security at the estimated fair value. Market quotations may not be available, for example, if trading in particular securities has halted during the day and not resumed prior to the close of trading on the New York Stock Exchange. As of March 31, 2016, there were no securities that were internally fair valued. For financial reporting purposes, investment transactions are recorded on the trade date.

In determining fair value, the Fund uses various valuation approaches. Generally accepted accounting principles in the United States of America (“GAAP”) establishes a fair value hierarchy for inputs used in measuring fair value that maximizes the use of observable inputs and minimizes the use of unobservable inputs by generally requiring that the most observable inputs be used when available. Observable inputs are those that market participants would use in pricing the asset or liability based on market data obtained from sources independent of the Fund. Unobservable inputs reflect the Fund’s assumptions about the inputs market participants would use in pricing the asset or liability developed based on the best information available in the circumstances. The inputs or methodologies used for valuing securities are not necessarily an indication of the risks associated with investing in those securities.

The fair value hierarchy is categorized into three levels based on the inputs as follows:

Level 1 — Valuations based on unadjusted quoted prices in active markets for identical assets.

Level 2 — Valuations based on quoted prices for similar securities or in markets that are not active or for which all significant inputs are observable, either directly or indirectly.

Level 3 — Valuations based on inputs that are unobservable and significant to the overall fair value measurement.

The following table summarizes the Fund’s investments as of March 31, 2016, based on the inputs used to value them:

<u>Valuation Inputs</u>	<u>Investments in Securities</u>
Level 1 — Common Stocks	\$101,866,710
Short-Term Money Market Fund	3,869,683
Total Level 1	105,736,393
Level 2 — Short-Term U.S. Treasury Securities	13,996,014
Level 3 —	—
Total	<u>\$119,732,407</u>

It is the Fund’s policy to recognize transfers between levels at the end of the reporting period. During the period ended March 31, 2016, the Fund did not recognize any transfers to/from level 1 or level 2. The Fund did not invest in any level 3 investments during the year.

See the Schedule of Investments for investments detailed by industry classification.

Provident Trust Strategy Fund
Notes to Financial Statements (Continued)
March 31, 2016 (Unaudited)

- (b) The Fund may purchase securities on a when-issued or delayed delivery basis. Although the payment and interest terms of these securities are established at the time the purchaser enters into the agreement, these securities may be delivered and paid for at a future date, generally within 45 days. The Fund records purchases of when-issued securities and reflects the value of such securities in determining net asset value in the same manner as other portfolio securities. For the six month period ending March 31, 2016 there were no such securities.
- (c) Net realized gains and losses on sales of securities are computed on the identified cost basis.
- (d) Dividend income is recorded on the ex-dividend date. Interest income is recorded on the accrual basis. The Fund records the amortization and accretion of discounts and premiums on securities purchased using the effective interest method in accordance with GAAP.
- (e) The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from these estimates.
- (f) No provision has been made for federal income taxes since the Fund has elected to be taxed as a “regulated investment company” and intends to distribute substantially all net investment company taxable income and net capital gains to shareholders and otherwise comply with the requirements of Subchapter M of the Internal Revenue Code of 1986, as amended, applicable to regulated investment companies.
- (g) The Fund has reviewed all open tax years and major jurisdictions, which include Federal and the state of Wisconsin, and concluded that there are no significant uncertain tax positions that would require recognition in the financial statements. The Fund recognizes interest and penalties, if any, related to unrecognized tax benefits on uncertain tax positions as income tax expense in the Statement of Operations. During the six month period ending March 31, 2016, the Fund did not incur any interest or penalties. Open tax years are those that are open for exam by taxing authorities and, as of March 31, 2016, open federal tax years include tax years ended September 30, 2012 through 2015. The Fund has no examinations in progress and is also not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will significantly change in the next twelve months.
- (h) GAAP requires that certain components of net assets relating to permanent differences be reclassified for financial and tax reporting. These differences are caused primarily by differences in the timing of the recognition of certain components of income, expense or realized capital gain for federal income tax purposes. The Fund may utilize earnings and profits distributed to shareholders on redemption of shares as part of the dividends paid deduction. These reclassifications have no effect on net assets, results of operations or net asset value per share.
- (i) In preparing these financial statements, management has evaluated events and transactions for potential recognition or disclosure through the date the financial statements were issued. Management has determined that there were no subsequent events that would need to be disclosed in the Fund’s financial statement disclosures.

(2) Investment Adviser and Management Agreement and Transactions With Related Parties

The Company, on behalf of the Fund, entered into an investment advisory agreement (the “Advisory Agreement”) with Provident Trust Company (“PTC”), with whom certain officers and a director of the Fund are affiliated, to serve as the investment adviser. Under the terms of the Advisory Agreement, the Fund pays 0.75% on the first \$30,000,000 of the daily net assets, 0.65% on the daily net assets in excess of \$30,000,000 and less than \$100,000,000 and 0.60% on the daily net assets over \$100,000,000. The Fund is responsible for paying a share of the compensation, benefits and expenses of its Chief Compliance Officer. For administrative convenience, PTC initially makes these payments and is later reimbursed by the Fund.

Pursuant to an expense cap/reimbursement agreement between PTC and the Company, PTC has agreed to waive a portion of its management fee and/or assume expenses for the Fund to the extent necessary to ensure that the Fund’s total

operating expenses, excluding taxes, interest, brokerage commissions and other costs relating to portfolio securities transactions (including the costs, fees and expenses associated with the Fund's investments in other investment companies) and other extraordinary expenses, do not exceed 1.00% of the Fund's average daily net assets on an annual basis. The expense cap/reimbursement agreement will continue in effect until January 31, 2017 with successive renewal terms of one year unless terminated by PTC or the Company prior to any such renewal. PTC is entitled to recoup such amounts from the Fund for a period of up to three years from the date PTC reduced its compensation and/or assumed expenses for the Fund. At March 31, 2016, the cumulative unreimbursed amount paid by PTC is \$38,145. PTC may recoup all or a portion of this amount no later than the dates stated below:

<u>September 30, 2018</u>	<u>September 30, 2019</u>
\$16,652	\$21,493

The Fund adopted a Distribution Plan (the "Plan") pursuant to Rule 12b-1 under the 1940 Act. The Plan provides that the Fund may charge a distribution and service fee equal to 0.25% (on an annualized basis) of the Fund's average daily net assets. Amounts payable under the Plan are paid monthly for any activities or expenses primarily intended to result in the sale of shares of the Fund. For the six month period ending March 31, 2016, no such expenses were charged to shareholders.

Under the Company's organizational documents, each director, officer, employee or other agent of the Company is indemnified, to the extent permitted by the 1940 Act, against certain liabilities that may arise out of performance of their duties to the Company. Additionally, in the normal course of business, the Company, on behalf of the Fund, enters into contracts that contain a variety of indemnification clauses. The Fund's maximum exposure under these arrangements is unknown as this would involve future claims that may be made against the Fund that have not yet occurred. However, the Fund has not had prior claims or losses pursuant to these contracts and believes the risk of loss to be remote.

At March 31, 2016, 16.94% of the outstanding shares of the Fund are owned by PTC.

(3) Credit Agreement

U.S. Bank, N.A. has made available to the Fund an unsecured line of credit in the amount of \$11,000,000, pursuant to an amended Credit Agreement ("Agreement") effective January 31, 2016, for the purpose of having cash available to satisfy redemption requests. Principal and interest on such loan under the Agreement is due not more than 20 days after the date of the loan. Amounts under the credit facility bear interest at a rate per annum equal to the current prime rate minus one percent on the amount borrowed (2.50% on March 31, 2016). The Credit Agreement is renewable annually on January 30. Prior to January 30, 2016, the amount of the line of credit was \$13,000,000, subject to the same terms and interest rate. During the six month period ending March 31, 2016, the Fund did not utilize the lines of credit.

(4) Distributions to Shareholders

Net investment income and net realized gains, if any, are distributed to shareholders at least annually. Distributions to shareholders are recorded on the ex-dividend date. On December 18, 2015, the Board of Directors declared a distribution of \$0.00911273 per share from net investment income, \$0.00301 per share from short-term capital gains, which will be treated as ordinary income, and \$0.85338 from long-term capital gains, payable December 18, 2015, to shareholders of record on December 17, 2015.

(5) Investment Transactions

For the six months period ending March 31, 2016, purchases and proceeds of sales of investment securities (excluding short-term securities) were \$2,324,609 and \$10,819,303, respectively.

(6) Income Tax Information

The following information for the Fund is presented on an income tax basis as of September 30, 2015:

<u>Cost of Investments</u>	<u>Gross Unrealized Appreciation</u>	<u>Gross Unrealized Depreciation</u>	<u>Net Unrealized Depreciation on Investments</u>	<u>Distributable Ordinary Income</u>	<u>Distributable Long-Term Capital Gains</u>
\$55,593,319	\$49,233,932	\$(1,319,456)	\$47,914,476	\$41,897	\$7,994,798

The difference between the cost amounts for financial statement and federal income tax purposes, if any, is due primarily to timing differences in recognizing certain gains and losses in security transactions.

The tax components of dividends paid during the six month period ending March 31, 2016, and the year ended September 30, 2015 are:

<u>March 31, 2016</u>		<u>September 30, 2015</u>	
<u>Ordinary Income Distributions</u>	<u>Long-Term Capital Gains Distributions</u>	<u>Ordinary Income Distributions</u>	<u>Long-Term Capital Gains Distributions</u>
\$113,571	\$7,994,835	\$206,018	\$9,557,495

Additional Information (Unaudited)

For additional information about the Directors and Officers or for a description of the policies and procedures that the Fund uses to determine how to vote proxies relating to portfolio securities, please call 1-855-739-9950 and request a Statement of Additional Information. One will be mailed to you free of charge. The Statement of Additional Information is also available on the Fund's website at <http://www.provfunds.com> or the website of the Securities and Exchange Commission (the "Commission") at <http://www.sec.gov>. Information on how the Fund voted proxies relating to portfolio securities is available without charge by calling 1-855-739-9950, or on the Fund's website at <http://www.provfunds.com>, or the website of the Commission no later than August 31 for the prior 12 months ending June 30. The Fund files its complete schedule of portfolio holdings with the Commission for the first and third quarters of each fiscal year on Form N-Q. The Fund's Form N-Q is available on the Commission's website. The Fund's Form N-Q may be reviewed and copied at the Commission's Public Reference Room in Washington, D.C., and information on the operation of the Public Reference Room may be obtained by calling 1-800-SEC- 0330.
